

Washing Solution OK Series (Liquid type)

Washing Solution OK series are an environment-friendly water-soluble cleaner developed for optical lenses. Due to its excellent detergency and emulsifying properties, it is a cleaner that can be used not only for cleaning optical glass and metal materials, but also for a wide range of industrial fields.

1. Features

- (1) The optical lens can be cleaned.
- (2) Low cost because it is diluted with water and used.

2. Typical properties

Property	Washing Solution		
	OK-306-C	OK-307-C	OK-309-C
Appearance	Colorless, Clearness	Colorless, Clearness	Colorless, Clearness
Density (15°C) g/cm ³	1.06	1.02	1.01
pH (2% Water solution)	About11	About11	About10
Solubility in water (RT)	Dissoluble	Dissoluble	Dissoluble
BOD mg/L (2% Water solution)	660	650	50
COD mg/L (2% Water solution)	4800	3400	2300
Applicable glass material	General	General, Soft	Special soft

3. Application

Degreasing cleaning of precision optical glass, degreasing cleaning of precision parts.

4. How to use

- (1) Temperature: Room temperature
- (2) Concentration: 1~3%
- (3) Cleaning method: Ultrasonic, immersion, shaking etc.
- (4) Dissolution method: Dilute with water (Warm water dissolves more easily).

5. Attention

- (1) Wear protective gloves when using.
- (2) If in eyes, rinse with water for 15minute, and get medical attention.
